Portfolio Website

Web Development Work, *A showcase of my projects and my abilities* ⬚

Work History Projects

September 2021

website designer - developer, *Web Design Company's Website - Web Craft Station* ⬚
Successfully designed, created, and launched a 53-page fully responsive website compatible with all devices. Crafted a visually appealing and intuitive user interface aligned with the industry's requirements, ensuring effective communication with potential customers. Conducted thorough research to incorporate content recommendations, resulting in improved organic SEO performance. Implemented a well-crafted link-building strategy to enhance online visibility and reach.

November 2020

website designer - developer, *Affiliate Marketing Website - Supplement Insights* ⬚
Built a feature-rich Amazon E-Commerce affiliate marketing site and blog, spanning 454 pages and using WordPress. Seamlessly linked over 1,000 products and incorporated essential plugins for user-friendly forms and a convenient product search functionality. Utilised analytics to monitor website traffic, visits, and sales. Designed logos and mockups, developed web pages and custom widgets, resolved bugs, done application migration, image and content optimisation, developed and integrated content marketing strategies and so on.

December 2019

website designer - developer,
Website for a Provider of Translation Services - Leeds Translations ⬚
During the development of this 72-page website, I made a brand new, fully responsive web design layout. I carefully designed, developed, and thoroughly tested HTML, CSS, and JavaScript code to ensure adherence to accessibility and web browser standards. Furthermore, I authored unique and captivating content tailored to the website's target audience. Optimised the application for speed and scalability with page load times less than ~2 seconds.

January 2019	**website designer - developer,**
	The Website for Personal Training Services Provider - Fitness Designs ↗
	Designed, developed, and hosted this 52-page, all-device fully responsive website. Successfully optimized this website for speed and SEO, which improved page rank by ~75%. Performed the duty of fixing the technical issues related to the design and programming of this website.

Hobbies & Interests

- Web Development - always try to listen to weekly podcasts with the latest web development that cover news and discussions in the field.
- Hi-Tech news in general. A new revolutionary gadget coming out? I have to know everything about it.
- I enjoy learning new languages and cultures, keeping up with current events, and travelling. Currently fluent in 4 languages, English, Lithuanian, Spanish, and Russian, with a keen interest in learning Portuguese and German.
